Method of Delivery: Instructor Lead Classroom OR Virtual Session of 2 Days Duration; Delivered as a public session OR in-house

Target Audience: Consultants that are implementing Material Management Modules (such as MM in SAP S4HANA), Sales & Distribution Modules (such as SD in SAP S4HANA), Warehouse Management Module (such as EWM in SAP) and to an extent Production Planning Modules (such as PP in SAP S4HANA) will greatly benefit from this training.

Supply Chain is backbone of any organization which deals with understanding your customer requirements and then delivering the product to the customer effectively and efficiently. Supply Chain for an organization range between 2-6% of its net sales, which is a significant amount of money. Hence, it is very beneficial to organizations to make their supply chain effective and efficient resulting in cost reduction and increase in customer satisfaction. Supply Chain has different components such as Supply & Demand Planning, Warehousing, Transportation and Purchasing.

Training Course Introduction:

This is a unique training for ERP implementation consultants that will **help them match Supply Chain business requirements with the ERP capabilities**. ERP consultants are aware of the technical capabilities of the system (such as in SAP S4HANA, SAP Business One, Oracle, QAD Mfg. Pro, Microsoft Dynamics, etc.). This training bridges the gap between technical knowledge and supply chain business requirements leading to a successful implementation.

Training Course Objectives:

- To define Supply Chain
