Training Course Level: Basic – Intermediate – Advanced

Method of Delivery: Instructor Lead Classroom OR Virtual Session of 2 Days Duration; Delivered as a public session OR in-house

Target Audience: Supply Chain Staff, Warehousing Staff, Inventory Planning Staff, Distributors...

Supply Chain is backbone of any organization which deals with understanding your customer requirements and then delivering the product to the customer effectively and efficiently. Supply Chain for an organization ranges between 2-6% of its net sales, which is a significant amount of money. Hence, it is very beneficial to organizations to make their supply chain effective and efficient resulting in cost reduction and increase in customer satisfaction. Supply Chain has different components such as Supply & Demand Planning, Warehousing, Transportation and Purchasing.

Training Course Introduction:

Warehousing cost is the most significant cost among the supply chain components. Hence, it is imperative to reduce this cost by increasing the efficiency of the warehouse operations, and by reducing the time to deliver the product to the customer. This training provides practical aspects to achieve these goals i.e. to reduce of warehousing cost and increase customer satisfaction.

Training Course Objectives:

- To learn Fundamentals of Warehousing
